

Railway Capabilities

Our innovative approach to tackling complex rail jobs has led to further investment to our already substantial trailer fleet, with the recent addition of a rear power-steered extendable 118ft Broshuis trailer, and 'Long Tall Sally' our Semi-Low Loader equipped with a 43ton/mtr front mounted Hiab with a rear steer tri-axle 20mtr trailer, both vehicles provide a cost effective and convenient transport solution for larger sections of ready made S&C equipment and track lengths.
