

Removal and Installation Projects

Client: Mace

Location: Stansted South Terminal Extension

Project: Boiler Installation

Brief: Provide Risk Assessment and Method Statement for installation of 28 ton boiler.

Arrange for mobile crane to unload boiler .

The boiler was then skated into the terminal in 2 sections due to restricted access , using a specially fabricated steel gantry provided by our coded welder the top half was winched up into the roof space to allow the bottom half to be skated in underneath.
